I Groups of goods

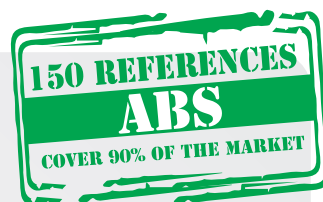

Ignition coils

The range of SKV Germany ignition coils reaches almost 150 references, which cover 95% of the market. SKV Germany ignition coils are produced by factories that cooperate with the most reputable ignition coils suppliers on the market. High spark energy gives easy ignition and stable engine work, which is essential especially for cars with LPG fittings. Adequate spark generated by coil voltage allows to reduce fuel consumption and raise both efficiency and longevity of engines.

ABS sensors

SKV Germany offers over 150 ABS sensor models, which means 90% of the European market cover. SKV Germany ABS sensors characterise with:

- safety
- high-quality workmanship
- work parameters equal to OE quality
- longevity

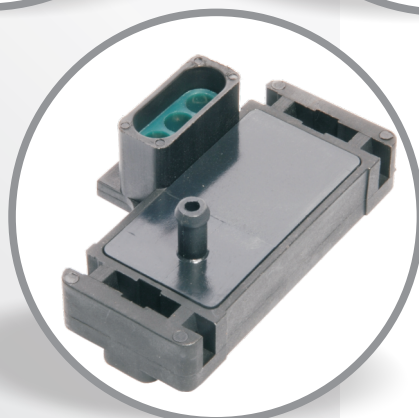

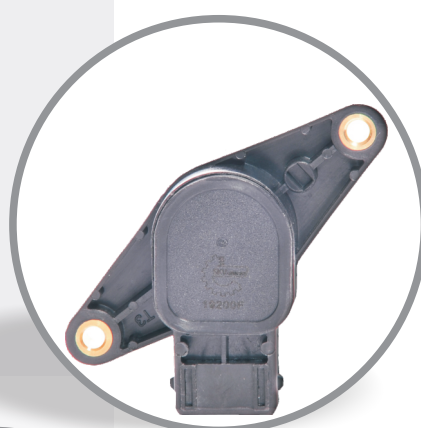

Various sensors

Trying to meet market needs SKV Germany offers wide range of car sensors.

In SKV Germany offer you may find:

- MAP sensors
- throttle body potentiometers
- crankshaft sensors
- camshaft sensors
- air conditioning pressure sensors
- and many more

Buying SKV Germany sensors you choose quality, reliability and safety for reasonable price.

Crankshaft pulleys

High quality and eye-catching price are main advantages of SKV Germany crankshaft pulleys, which:

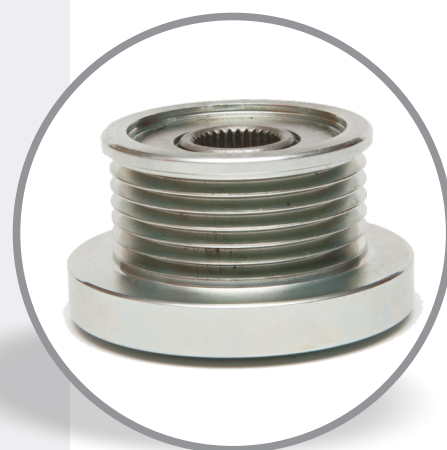

- fulfil 100% of customers expectations
- characterise with durability and reliability

Picking SKV Germany crankshaft pulleys you choose OE quality of products.

Alternator pulleys

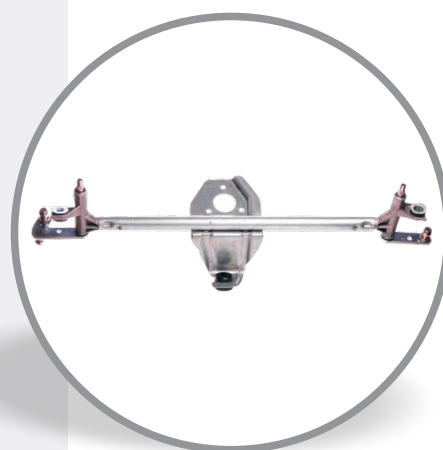

SKV Germany offers several dozen alternator pulley models, which are produced by the same factory that supplies leading brands. The only difference is the price, which is undisputedly in SKV Germany favour. We highly encourage to take a look at alternator pulleys range.

Wiper linkages and motors

Wiper motors and linkages offered by SKV Germany characterise with:

- durability
- resistance to hard weather conditions
- abrasion resistance
- the highest quality for reasonable price

Window lifters

Window lifters, as the name may suggest, are responsible for lifting and dropping car windows. Therefore it is essential to choose the right part.

SKV Germany window lifters characterise with high quality and reliability in all conditions that you can get for a good price.

In SKV Germany offer you may find both electric and manual lifters as well as ones with plate and motor.

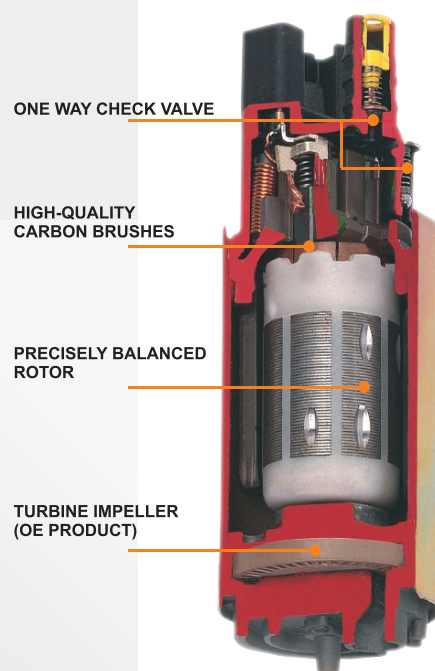

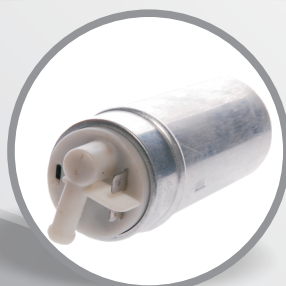

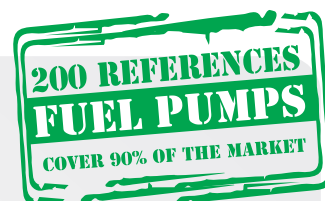

Fuel pumps

SKV Germany fuel pumps mean:

- quality of default factory-made parts
- low noise level of a working pump
- optimal fuel supply
- reliability and longevity
- maximum safety

SKV Germany offer covers 99% cars on the market with over 200 fuel pump models.

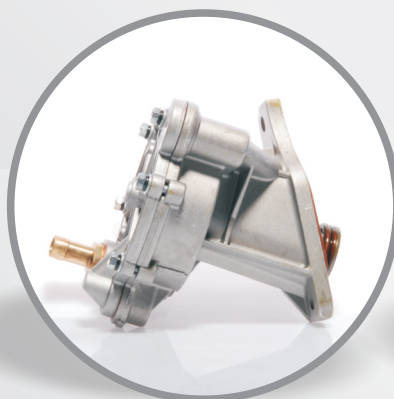

The fact is that plenty of aftermarket fuel pumps are available only in the SKV offer.

Vacuum pumps

In the range of SKV Germany products you may also find vacuum pumps. SKV Germany vacuum pumps characterise with:

- longevity equal to OE products
- quality and safety
- high workmanship quality

Power steering pumps

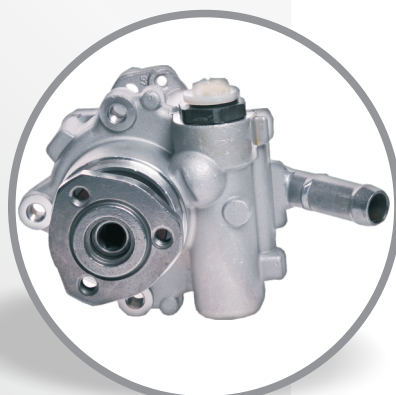

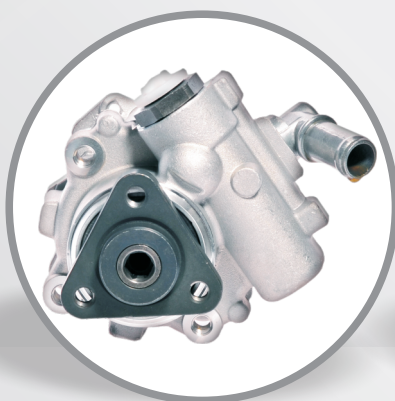

Power steering pumps are one of the main products in SKV Germany offer with over 120 references.

SKV Germany power steering pumps, among few aftermarket parts, provide trouble-free work.

Valves which are considered to be the key to power steering pumps fail-safety come from OEs, which means stable and long-lasting work.

SKV Germany steering pumps supplier produces OEs for some car brands. Moreover, the pumps characterise with extremely low complaint rate, which amount to less than 0,5%.

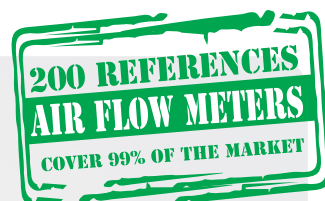

Washer pumps

Clean wind-screen plays very important role taking safety issues into consideration. SKV Germany washer pumps help to achieve expected goal thanks to appropriate washer liquid pressure.

Buying SKV Germany washer pumps you choose quality and safety for reasonable price.

Air flow meters

SKV Germany offer includes almost 200 air flow meter references described as new-generation products. "Hot wire" measuring technique which we can observe in cheap substitutes has been replaced with significantly more accurate and quicker method called "hot film" which makes air flow meter's work similar to original parts.

SKV Germany air mass sensors improve engine's work parameters and increase it's longevity. Moreover, SKV air flow meters reduce fuel consumption thanks to high precision of air mass measuring.

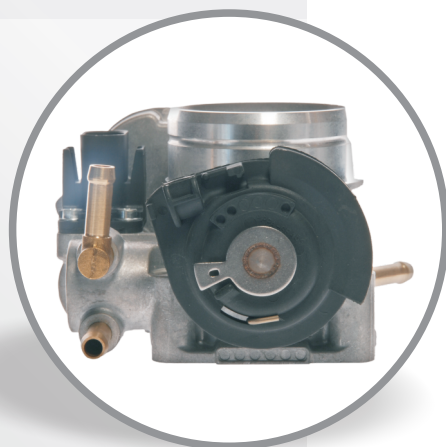

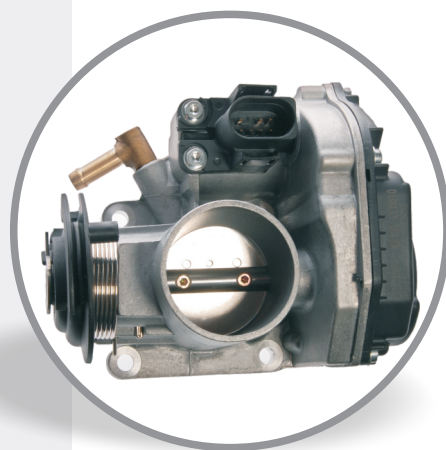

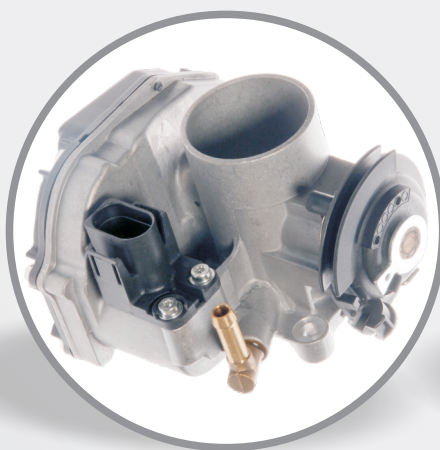

Throttle bodies

The wide range of SKV Germany throttle bodies is an interesting addition to the electronics offered by the supplier.

SKV Germany throttle bodies are totally trouble-free during the adaptation and provide stable engine work.

Thanks to the high workmanship quality SKV throttle bodies assembly is simple and problem-free. What is more, our throttle bodies characterise with long-lasting and trouble-free work which is considered to be the main advantage.

Blower resistors

Resistors are responsible for regulating the intensity of air stream which enters the vehicle. Blower resistors provided by SKV Germany are:

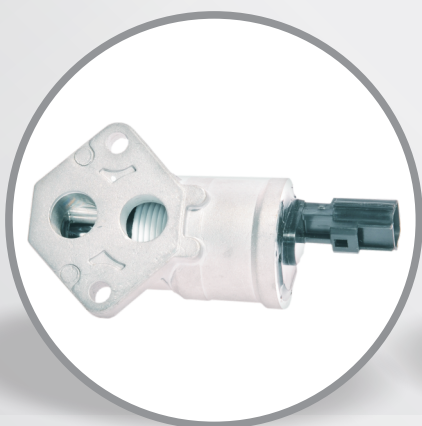

- long-lasting
- highly efficient
- able to deliver optimal air stream and driving comfort
- useful helping to get rid of steamy wind-screens
- both affordable and high-quality

Idle control valves

Idle control valves make a group of over 100 parts in SKV Germany offer. SKV idle control valves provide correct composition of air-fuel mixture (also in cars with LPG fittings). Thanks to stable work of the valve engine works evenly which results in reduced fuel consumption. Unlike cheap aftermarket parts, SKV Germany products characterise with longevity and trouble-free work.

Oxygen sensors

**200 REFERENCES
OXYGEN SENSORS
COVER 98% OF THE MARKET**

Trying to meet the market needs SKV Germany established cooperation with supplier of Begar Français oxygen sensors. The range of oxygen sensors includes almost 200 references, which completely meets the market expectations. The precision and quickness of measuring offered by Begar oxygen sensors provides correct composition of air-fuel mixture.

High quality of Begar products is confirmed with titanium sensors (working between 0-5 V) that are present in the offer. It is important to underline that none of aftermarket manufacturers is able to offer titanium oxygen sensors due to advanced production technology.

Thermostats

Advantages of SKV Germany thermostats:

- fitting precision
- tightness
- reliability
- perfect quality for affordable price
- provision of correct engine temperature while driving

Control arms and suspension elements

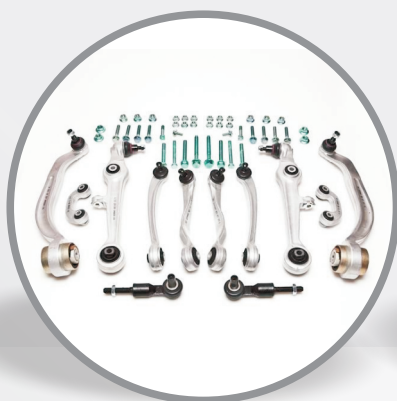

SKV Germany offers high-quality control arms and other suspension elements. The quality has been confirmed with almost no complaints.

SKV Germany control arms mean:

- durability
- safety
- good price

SKV company offers both control arm sets and single elements.

Clutch slave cylinders

Clutch slave cylinders produced by SKV Germany provide correct and long-lasting work of the clutch.

Thanks to the improved construction clutch slave cylinders characterise with better longevity than products offered by the competition.

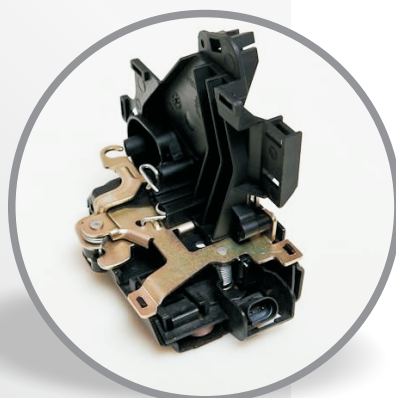

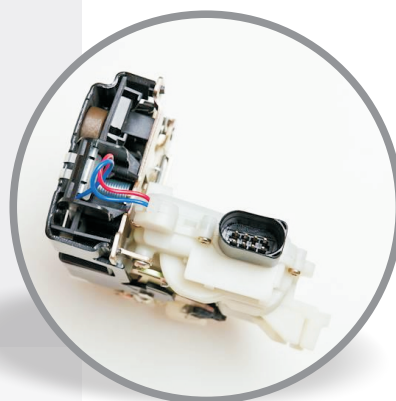

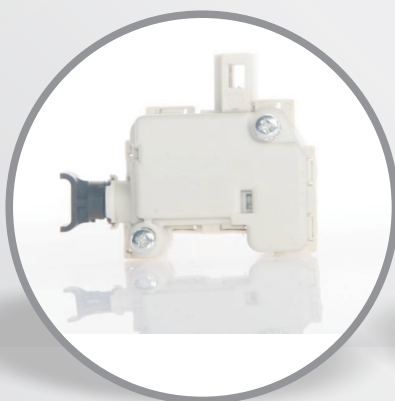

- quality and longevity equal to OE products
- good price
- safety and driving comfort

Auto locks

SKV Germany auto locks significantly improve the comfort of using a car.
We focus on:

- balance between quality and price
- long-lasting work reliability
- the highest workmanship quality

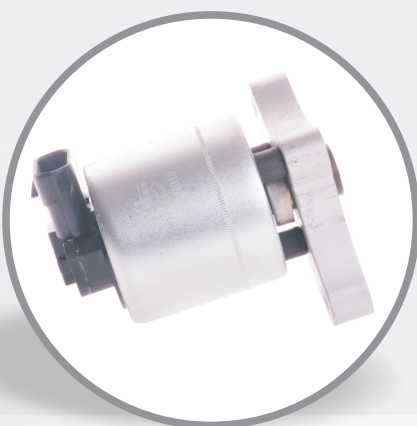

EGR valves

SKV Germany offers exhaust gas recirculation valves commonly known as EGR valves.

SKV Germany EGR valves mean:

- high workmanship quality
- reliable trouble-free work
- longevity
- work precision

II Advertising aids

We provide all our customers with technical support and help with promoting goods bought from our company. Graphic designs presented below are only samples as we have wide variety of advertising aids. Moreover, we are open for customers' propositions to design projects for their use.

We share the pictures database of our products, variety of banners as well as other graphic additions, which can be used by customers for example on their websites.

We offer the print of two-sided leaflets promoting our customer's company and SKV brand. Leaflets may apply to the whole assortment or particular groups.

Jakość oryginału cena zamiennika

W ofercie również:

- czujniki ciśnienia MAP
- czujniki wałka rozrządu
- czujniki wału korbowego
- koła alternatora
- mechanizmy wycieraczek
- pompy spryskiwaczy
- pompy vacuum
- potencjometry przepustnicy
- sondy lambda
- wahacze
- wysprzęgliki
- zamki centralne
- zawory nagrzewnicy

Our company is open for cooperation therefore we prepared the catalogue in form of the PC application for wholesale customers. The application includes the interface with customer's logo and contact details, which makes it look more personal. It enables distributing the application among customer's business partners.

We offer free banners which can be hung for example on the wall.
This form of advertising may present either general SKV assortment
or only particular groups.

III Logistic issues

Complaints

We do what is in our power to make sure that our products are as perfect as possible. However, the issue of complaint is unavoidable. Therefore we show conscientious attitude towards complaints. We have the equipment which allows us to diagnose defects in simple and correct manner. We guarantee technical support and examination of complaints in no more than 7 days starting from the date of receiving the good.

Logistic solutions

As the biggest distributor of SKV brand we have managed to establish cooperation with the biggest logistic companies such as DPD, GLS, UPS, TNT, FedEx etc. Therefore we are able to send our products wherever we need for reasonable price.
